## DETAILED ACTION

### *Claim Objections*

Claims 5 and 6 are objected to because of the following informalities: in amendment of Paper No. 16, received 11/17/03, Applicant has inserted the number "1" after the word "claim" in the first line of each claim, but did not cancel the number "4" that was there. Currently the claims read "device recited in Claim 1 4, wherein . . . ." Appropriate correction is required.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, and 15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3-16 of U.S. Patent No. 6,135,990. Although the conflicting claims are not identical, they are not patentably distinct from each other because they each recite a device for manipulating a molecule in vivo including an elongated member of alternating electrodes and sleeves with the electrode or sleeve protruding from the bottom of the other on the elongated member. The electrodes are claimed in the application and patent to be simultaneously activated.

***Request for Clarification***

In examining the claims, the examiner interpreted the “discrete electrodes” recited in claim 1 as requiring the electrodes to be in independent circuit communication with a respective source of electrical energy. In order to clarify the claims, Applicant is requested to amend claims 1 and 15 to recite this “independent circuit communication.” If Applicant is not requiring the discrete electrodes to have independent circuit communication, then Applicant is requested to address how the electrodes are discrete without independent circuit communication in his next response to this paper.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
